

### 3-D RANDOM TUBULAR | 3-D BLACK CORE, CLEAR TRANSPARENT FACINGS

#### Specifications

**HONEYCOMB CORE:** Black UV-stabilized polycarbonate in 3 cell diameters (3mm, 7mm, 10mm), randomly arranged  
**FACINGS:** Clear Transparent (CT) or Clear Satin (CS)

**DIMENSIONS:** 39.4" x 118.7" x 13/16"

#### Fabrication Options

ClearConnect™ Wall System (kerf or spline) for minimal detailing and reduced installation time  
 PANELITE Snap™ Wall and Ceiling System with removable panels, prefabricated to save time and labor onsite  
 Edge – Flush finished  
 Edge – Structural fin  
 Miter – Permanently bonded  
 Cutting to size

#### Sustainability

**MORE LIGHT:** Approx. 65% diffuse transmission of daylight to reduce artificial lighting energy requirements. Panels can also be used for backlighting applications to enhance design/user comfort.

**MORE STRENGTH:** Honeycomb offers exceptional durability and deflection-resistance, increasing overall life cycle, reducing the material needed for structural support and the time and labor needed for installation

**LESS WEIGHT:** Bonded Series panels average 40 lbs per panel and use 70-80% less raw material than glass or resin sheets of comparable thickness.

**LESS TIME:** Lightweight, deflection-resistant panels with installation-friendly details save significant labor onsite
